MITHA LATHIFAH ARETHUSA

Flutter Developer | Technical Writer

📞 +62 878-7213-1850 | 📧 lathifah.arethusa27@gmail.com | 🔗 linkedin.com/in/mithalathifah

Professional Summary

Detail-oriented Flutter Developer with over 3 years of experience in mobile application development using Dart and REST APIs. Skilled in writing and maintaining clear technical documentation, API references, and developer guides to support internal teams and product development. Combines strong technical expertise with the ability to communicate complex concepts clearly and effectively for diverse audiences.

Professional Experience

Sirka – Mobile Application Developer

Jakarta Selatan | May 2024 – Sept 2025

- Developed and updated mobile applications based on business concepts and UI/UX designs.
- Implemented Doctor Consultation feature, displaying appointment lists and sorting by most recent, along with a medical record history view.
- Performed debugging, performance optimization, and maintenance to ensure stable and responsive applications.
- Created and maintained internal documentation for mobile modules and REST API integrations using Google Docs and Notion.
- Managed App Store and Google Play Store publishing processes, including version updates and review approvals.

PT Indonesia Satu Tujuh – Flutter Developer / Mobile Application Developer

Jakarta Selatan | Nov 2019 – May 2024

- Developed and maintained Flutter-based applications integrated with REST APIs.
- Implemented video editing features (audio mixing, trimming, real-time preview).
- Migrated legacy modules to Flutter, enhancing app consistency and maintainability.
- Integrated Google Analytics and Adjust Tracker for behavior and marketing analysis.
- Collaborated with design and QA teams to ensure optimal UX and early bug detection.
- Published updates to Google Play Store, ensuring smooth version releases with 0 rollback incidents.

- Documented API endpoints and provided developer handover guides for internal use.
- Produced feature specification notes and technical summaries for cross-functional teams.

Gunadarma University – Laboratory Assistant

Depok | Jun 2017 – Sep 2019

- Taught FPGA, Android App Programming, and Computer Networking courses.
- Assisted in practical sessions and guided students in laboratory projects.
- Helped prepare learning materials and documentation for programming labs

Documentation Experience

Authored API and feature documentation to support internal teams and QA onboarding. Ensured clarity and consistency across Flutter project documentation.

Projects
- Sirka (Health App) – A telemedicine app enabling online doctor consultations and health record tracking. (Play Store & App Store)
- MILOV (Love Game App) – An interactive relationship-based mini-game app built with Flutter. (Play Store)
- Pantura (Dangdut Music App) – A mobile app for Dangdut Pantura music, allowing users to stream videos and participate in interactive quizzes. (Play Store)
- MViCall (My Videotone Call App) – A multimedia personalization app allowing users to replace ringtones with videos during calls. (Play Store)
- IoT-Based Smart Attendance System (Thesis Project) – Designed an Arduino-based attendance and smart lock system using RFID and touch sensors to monitor server room access.

Education
Gunadarma University – Bachelor's Degree in Computer System
Depok | 2015 – 2019 | GPA: 3.46 / 4.00

SMK Negeri 1 Cibinong – Software Engineering
Kabupaten Bogor | 2012 – 2015

Technical Skills

Technical Writing • Flutter • Dart • Android Studio • Firebase • REST API • Git • Provider / BLoC • Clean Architecture • CI/CD • App Store Deployment • App Performance Optimization

Certificates

- Microsoft – HTML5 Application Development: Fundamentals
- Microsoft – SQL Server Database: Fundamentals
